

The nursery visited Balmossie fire station. We were shown a fire safety Dvd all about why it is dangerous to play with matches, then we got a tour of the fire station, we saw the machine where the message comes through to tell the fire engine where the emergency iswe had a message through the machine to say “Merry Christmas Mattocks nursery” We went with the firemen to see the garage where the 4 engines were kept. They showed us lots of things they use like cutters, hoses, heat camera, hats, boots etc. Then we got to go into the back of the engines, then into the front to drive. We got to spray the hoses, see the lights going, hear the sirens and we asked lots of questions.....”Where do you keep your mobile phones?” “How many engines do you keep here?” “Where does all the water go?” “Who’s hat is this one?” “What is this for?” The firemen were very good with us and managed to answer all our questions We found out that the fire station is Eco friendly too as all the water we sprayed went down the drain and into a tank and is re used for practising to put fires out.
